

# UGAHacks Project Plan

Aidan Bradley, Allyn Haynes, Jeffery John, Rayna Sklar, Colt Yeargin

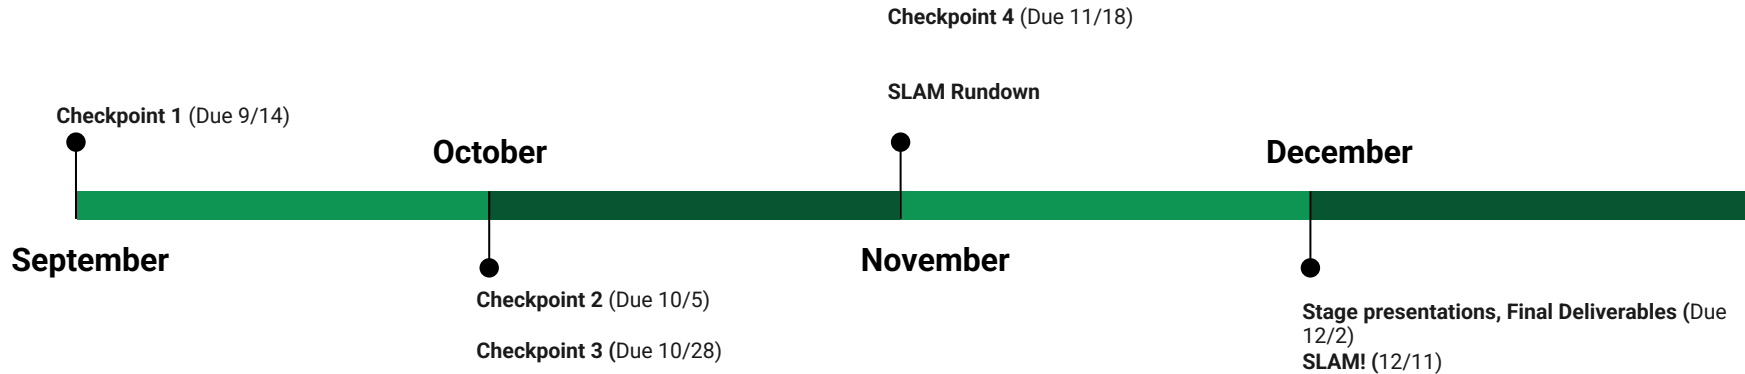

## Vision

- Our goal is to create a React Native application to assist our client, UGAHacks and its organizing team.
- Elements that our client would like for the app to include are Attendee log-in, Educational outreach, Event management, and Inventory management.
- UGAHacks sub teams will be available for consultation if questions arise about our final deliverables. In addition, our client, Jeffery John, is a team member for this project.

# Timeline

# Deliverables

## Checkpoint 1

Aidan Bradley	Presentation & Press Release
Allyn Haynes	Presentation & Exploratory Research
Jeffery John	Presentation & Alpha
Rayna Sklar	Presentation
Colt Yeargin	Presentation

## Checkpoint 2

Aidan Bradley	Presentation
Allyn Haynes	UX Map
Jeffery John	Beta & User Research
Rayna Sklar	Presentation
Colt Yeargin	Presentation

# Deliverables

## Checkpoint 3

Aidan Bradley	Presentation & Press Release
Allyn Haynes	Visual Design Documents & Website Beta
Jeffery John	1.0 & Visual Design Document
Rayna Sklar	Presentation & Website Beta
Colt Yeargin	Presentation

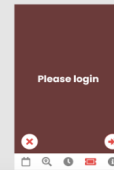

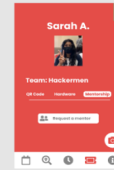

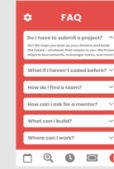

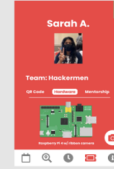

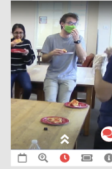

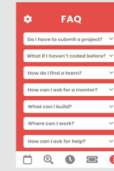

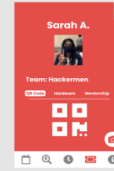

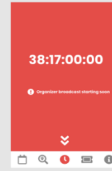

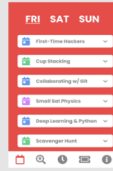

## Checkpoint 4

Aidan Bradley	Stage Presentation Beta
Allyn Haynes	Launch / Handoff / Social Deliverables
Jeffery John	1.1
Rayna Sklar	Presentation & Website Beta
Colt Yeargin	Launch / Handoff / Social Deliverables

# Mobile App

Frame 1

## Final Deliverables - Stage Presentation

- We will produce an engaging 3-5 minute presentation showcasing our project's main features.
- The client will familiarize the audience with their organization and needs/wants for the product.
- We will explain what we innovated to solve the client's needs/wants.
- We will explain the technology used to create the solution for our client.

## Final Deliverables - Operational Project

- We will include the video of our trailer on our website showcasing the functionality of our website.
- We will be hosting the code on GitHub
- We will cross-compile the React Native between mobile devices and the website itself.

## Final Deliverables - Project Website

- This will include a overall summary of our project and final product.
- Our product will be explained in detail of what it does and how it serves as a solution to our client's needs/wants.
- The website will also be a place where we can upload our project assignments.

## Final Deliverables - Project Trailer & Poster

### Project Trailer

- The trailer will showcase the different clubs, organizations, and groups that make up Hackathon.
- The trailer will give insight on how to navigate the application.
- The trailer will also feature on site locations for UGAHack's Hackathon.

### Project Poster

- The poster will showcase our application.
- It will highlight key features of the application.
- The poster will also showcase different groups, clubs, and organizations that make up UGAHacks' Hackathon.

## Challenges / Roadblocks

- If unforeseen circumstances arise that are out of our control.
- Unequal distribution of work towards the final deliverables and overall project.
- Scheduling conflicts for team meetings outside of class time, if needed.
- Different levels of technical skills and/or abilities.
- Fear of asking for help
